About Me

Information Systems Engineer and published researcher working at the intersection of deep learning and cybersecurity, with four years of industry experience in cloud-native infrastructure, MLOps and information security (ISO 27001). First-ranked graduate of HIAST with two peer-reviewed journal publications. Currently in the Master 2 Multimedia Networking (Université Paris-Saclay & IP Paris) and seeking a 6-month end-of-study internship in **AI or security** from **April 2027**, with the goal of continuing toward a PhD.

Education

M2 **Master 2 in Multimedia Networking** — Sep 2026 – Sep 2027 (expected)
Université Paris-Saclay & Institut Polytechnique de Paris (Télécom SudParis), France

BSc **Information Systems Engineering – Operating Systems and Networks** — Oct 2016 – Sep 2022
Higher Institute for Applied Sciences and Technology (HIAST), Damascus, Syria
Final grade: 75.65% **(Ranked 1st)**

Thesis: *Deep Learning for Launching and Thwarting Attacks on AI-based Intrusion Detection Systems (IDS)* Link

Work Experience

Cloud-Native Engineer (Freelance), XBridge Technologies — UAE (remote), Aug 2026 – Present
Client: Boldyn Networks

- Designed and built a Kubernetes platform for a test lab on Talos Linux (immutable, API-managed OS with no SSH or shell), running on KVM virtual machines (1 control-plane and 3 worker nodes).
- Implemented the network design: dedicated routed subnet, static addressing, firewall rules and a stable API endpoint.
- Deployed the platform services: MetalLB, cert-manager, NGINX Ingress, Longhorn (3-way replicated storage) and Argo CD for GitOps continuous deployment.
- Automated the whole platform as code: full rebuild from scratch in about 20 minutes with a single command, validated by 34 automated checks, and documented it (runbook, design decisions, architecture diagrams).

Information Security Management System (ISMS) Manager, Maly Tech Ltd — Dubai, UAE, Aug 2025 – Aug 2026

- Led the organisation's ISO 27001 compliance: risk assessments, security audits and policy enforcement.
- Supervised external penetration testing and multi-stage security assessments covering infrastructure, application logic, data and performance.
- Developed and implemented incident response plans, and oversaw the secure operation of cloud environments.
- Worked with cross-functional teams to integrate security best practices into all systems and processes.

Lead DevOps & MLOps Engineer, Maly Tech Ltd — Dubai, UAE, Oct 2023 – Oct 2025

- Deployed AI-driven fintech platforms on AWS, GCP and Alibaba Cloud as Docker microservices orchestrated with Kubernetes.
- Designed and maintained secure, scalable infrastructure, including a managed Kubernetes (ACK) cluster on Alibaba Cloud and GitLab CI/CD pipelines.
- Built end-to-end MLOps workflows for versioning and deploying machine learning models, and data pipelines for AI analytics (AWS Glue, MongoDB Atlas, PostgreSQL).
- Technical point of contact for AI system integrations with MTN MoMo and Deloitte.

Information Systems Engineer, HIAST — Damascus, Syria, Oct 2022 – Feb 2024

- Delivered lectures and labs in Operating Systems, Networking and Security.
- Supervised undergraduate graduation projects, including distributed deep learning

and data-driven systems.
- Contributed to research and development in the OS and Networking lab, supporting experimental AI-based systems.

Academic Roles, AIU & ASPU — Damascus, Syria
Mar 2023 – Aug 2023
- Taught Operating Systems and Linux lab sessions, and supervised a graduation project on ML-based cybersecurity threat detection.

Backend Developer (VoIP), DIB — Germany
Oct 2022 – Jul 2023
- Engineered VoIP communication systems with Asterisk on Linux servers, managed MariaDB databases and containerised backend services with Docker.
- Performed server administration, monitoring, network configuration and system hardening.

Publications

COVID-19 Diagnosis with Deep Learning: Adjacent-pooling CTScan-COVID-19 Classifier Based on ResNet and CBAM. — Sep 2023

A. Deeb, **A. Debow**, S. Mansour, V. Shkodyrev, *Biomedical Signal Processing and Control*, Vol. 86, 105285, 10.1016/j.bspc.2023.105285

Predicting and Forecasting Water Quality Using Deep Learning. — Mar 2023

A. Debow, S. Shweikani, K. Aljoumaa, *International Journal of Sustainable Agricultural Management and Informatics*, 9(2), pp. 114–135, 10.1504/IJSAMI.2023.129858

Selected Projects (details on my website)

Contradiction Detection in English using Large Language Models (LLMs) Link	Jun 2025 – Present
AI-Powered Call Center Analytics Platform Link	Jun 2025 – Oct 2025
AI-Powered Sign Language & Assistive Technology Link	Feb 2025 – Jun 2025
Smart Recipe Recommendation System Link	Dec 2024 – Feb 2025
Explainable Movie Recommendations using Reinforcement Learning Link	Jun 2024 – Nov 2024
Federated Learning for Anomaly Detection Link	Jun 2023 – Aug 2023
TOR Network Detection via Machine Learning Link	Jan 2023 – Mar 2023

Technical Skills

- **Machine Learning & Deep Learning:** deep neural networks, convolutional and attention-based architectures, large language models, reinforcement learning, federated learning; model training, evaluation and deployment.
- **Security & Compliance:** ISO 27001 ISMS, risk assessment, security audits, penetration-test supervision, incident response, ML-based intrusion detection and adversarial attacks on IDS.
- **Cloud-Native & DevOps:** Kubernetes, Talos Linux, KVM, Docker; GitOps with Argo CD; Longhorn, MetalLB, cert-manager, NGINX Ingress; CI/CD (GitHub Actions, GitLab, Jenkins); Terraform, Ansible; AWS, GCP, Alibaba Cloud.
- **MLOps & Data:** end-to-end MLOps workflows, data pipelines (AWS Glue, MongoDB, PostgreSQL).
- **Systems & Networking:** Linux/UNIX administration, networking, traffic analysis, system hardening.
- **Programming:** Python, C/C++, Java, SQL, Bash; Git.

Languages

Arabic: native | **English:** B2/C1 (IELTS) | **French:** conversational | **German:** beginner

Volunteering & Clubs

Research Partner, American University of Beirut (AUB)	Jan 2026 – Present
Peer Reviewer, *Biomedical Signal Processing and Control* (Elsevier)	Jun 2025 – Present
Founder & Chief, AI and Python Club, HIAST, Damascus	Jan 2022 – Jun 2022
Founder, Chief & Judge, Chess Club, HIAST, Damascus	Oct 2020 – Jun 2022
Red Crescent Volunteer (COVID-19 Response), Tartous, Syria	Mar 2020 – Jun 2020
